Dr. R. E. Merrill, McInerney's Shoe Store, Fort above King. Private room for ladies. Charges reasonable. 5918-4f

### Y Old Migs repeated the words to himself dully and uncomprehendingly, as he tramped along to the court, where he was to appear as a witness in a local libel case.

Nervously he entered the witness box.

The fierce looking lawyer eyed him calculatingly.

"Do you swear," he said, "that this is not your handwriting?"

"I don't think so," stammered Migs. "Now be careful," insinuated the lawyer. "Are you prepared to swear that this handwriting does not resemble yours?"

"You take your oath that this does not in any way resemble your handwriting?" solemnly inquired the learned man.

"Yes, sir," stammered the witness, now thoroughly frightened.

"Well then, prove it!" denounced the lawyer triumphantly, as he thrust his head toward the witness.

This action woke the last spark of drooping courage in poor Migs, and thrusting forth his head, he yelled:

"Cos I can't write."

It's a shame to put a Want Ad in the paper. Can you read it? ANSWER TO YESTERDAY'S PUZZLE

## In the Woman's World

### RECIPES TRIED AND FOUND VERY SUCCESSFUL BY WOMEN OF HONOLULU

Recipes recommended by Mrs. Edwin Benner, Manoa Valley.

#### CHEESE SOUFFLE.

Make a thick white sauce of 2 level tablespoons butter, 2 level tablespoons flour, 1/2 cup milk. Salt. Yolks of three eggs. When cooked add 1 cup grated cheese, and set aside to cool. Before time to serve fold in the stiffly beaten whites of three eggs. Pour mixture into baking pan and bake slowly until well puffed up and nicely browned.

#### CHOCOLATE ROLL.

3 eggs. 1 cup sugar. 1 cup flour. 1 teaspoon baking powder. 6 tablespoons boiling water. Beat whites of eggs until stiff, add sugar gradually, then the well-beaten yolks, flour, baking powder and water. Pour into flat pan and bake in rather hot oven. Turn on to a sugared paper, spread with chocolate filling and roll like a jelly roll. Chocolate filling for above: Melt 2 squares of chocolate in small pan, add 1/2 cup sugar and 1/4 cup water. Stir until mixed, then add 1 teaspoon butter, 1/2 tablespoons cornstarch, mixed with 1/2 cup milk and stir until well cooked. Remove from fire and add vanilla. Use while warm. PAPAIA SHERBET. 3 pts. water, 1 qt. sugar, boil for 10 or 15 minutes. While hot dissolve in it 1/2 to 3/4 teaspoon gelatine which

has been soaked in cold water. Add to the above syrup when cold 1 small papaia. 2 oranges. 1 lemon. Scrape papaia, squeeze oranges and lemon, put all through a strainer. Freeze very hard.

#### DOUGHNUTS.

1 cup sugar. 1 teaspoon butter. 2 eggs. 1 cup milk. 2 rounded teaspoons baking powder. 4 cups sifted flour. Roll, cut into shape and fry in deep fat. If necessary add more flour, but the dough should not be any thicker than necessary to handle.

#### SOUR MILK BROWN BREAD.

1 cup sour milk. 1 teaspoon salt. 1 teaspoon soda. 1/2 cup N. O. molasses. 2 cups Graham flour. Raisins or nuts make a nice addition. Bake in a slow oven for one hour.

#### MOCHA CAKE.

2 eggs beaten 5 minutes, 1 scant cup sugar beaten gradually into eggs. Then add 1 large cup flour sifted with 2 teaspoons baking powder. Beat awhile, add 1/2 cup boiling milk in

which a tiny piece of butter has been dissolved. Beat the mixture again, put into pans and bake. Put the layers together with the following filling:

Butter size of egg. 1 cup powdered sugar. 2 teaspoons powdered chocolate. 1 tablespoon cold coffee. 1 teaspoon vanilla. Mix and spread. Do not cook the filling.

#### CARAMEL ICE CREAM.

Boil 2 cups sugar with 1/2 cup water without stirring until it begins to brown, then stir constantly until a golden brown in color. Remove from fire and dash in 1/2 cup cold water and stir until dissolved. Return to the fire until a good syrup has been obtained. When cool add 1 1/2 to 2 qts. of rich milk and cream.

#### DEVIL CAKE.

1/2 cup milk. 1/2 cup sugar. Yolk of one egg. 4 squares Baker's unsweetened chocolate. Cook all together and cool.

1 cup sugar.

1/2 cup butter.

1/2 cup milk.

Chocolate mixture already made.

2 eggs.

2 cups sifted flour.

2 teaspoons baking powder.

## GIRLS TAUGHT TO MAKE HOMES

The Johnny-cake of New England and the "alg" bread of the South are now finely blended in the corn bread of the West through instruction in domestic science.

Before the cornmeal, sour milk and soda are stirred up and seasoned, the teacher works in a little chemistry, explaining simply that an acid and an alkali neutralize each other. The girls taste the soda and the sour milk, and the laugh that follows the wry faces is not rebuked, for a class in cookery must always have some fun as it goes along. Neither of those tastes, the teacher explains, will be in the corn bread, for the resulting chemical compound is neither sour milk-lactic acid-nor soda, but something new and wholly different. Gas will be liberated which will raise the batter—that is, make it light and porous. The girls are all attention now.

"In the corn bread we make today we shall use half flour and half meal. Can any girl tell why?"

After it is explained that flour contains gluten which makes it sticky or pasty, and that the meal contains almost none, and that in a dough made entirely of cornmeal the gas would escape too soon, leaving the bread heavy instead of light, the girls are getting hold of a principle that they will use in many combinations. Learning how and why to modify recipes for corn fritters, griddle cakes, muffins, steamed brown-bread, and so on, gives the girls good theory and practice, for there are almost countless good things to be made from cornmeal.

Seven years later some of these same girls are in a college class in domestic science. They have had a good deal of practice in simple cookery and they know a good many principles, so they are combining them in various problems. They have had also higher mathematics and chemistry, so they are now equipped to take hold of matters entirely beyond the comprehension of a schoolgirl.

The general problem the young women are working on is, say, the cost of meats. It is a comparative study. Two of the girls are assigned chicken. How do they go about it? A good fowl is bought in the open market at 19 cents a pound dressed. But it is not dressed; only bled and plucked.

Head, feet and entrails are included and paid for in the four pounds 12 ounces, costing 86 cents. They find that after being dressed the bird weighs only three pounds three ounces. After being roasted it weighs only two pounds four ounces. After ever shred of meat has been picked from the bones it weighs only one pound six ounces; or for actual edible chicken the cost is 62 1/2 cents a pound.

Chemistry is in constant use in cookery, but how important it is in cleaning, dyeing and in the testing of textiles is not generally understood. Industrial plants employ chemists, and new products are continually coming on to the market—soaps, cleaning powders, dyes and disinfectants. The textile teacher will show her pupil a good looking sample of muslin and then by removing starch filler will show how coarse and cheap it is. In the selection, purchase, care and cleaning of the staple fabrics the housewife ought to be well informed.

Home decoration merits and is receiving more and more attention. The equipment for instruction along this line is growing better all the time. The pupil has access to a fine collection of samples of woods for interior finish. Fumed oak, golden oak, mission oak, may perhaps mean nothing to her till she studies them in connection with numerous other woods and in relation to various wall finishes; rough plaster, paint, paper, bur-lap and tapestry.

The comprehensive collections of materials, colors and patterns would fascinate any woman. The colored views of artistic interiors stimulate the imagination; pictures of rugs and draperies give data for forming comparative judgments.

The high cost of living is rapidly forcing the subject of home management into the center of the domestic science usage. The business side of home-making is well worth the careful thought of the ablest women. The housewife is in a position of sacred trust. She must ponder long and well how to get the maximum out of every dollar. It is a complicated problem to determine the most essential things out of thousands of good things and to inform yourself just where and when they can be bought to best advantage. Knowledge must precede judgment.

Every woman who is a wage-earner has a certain money value in three directions—to herself, to her employer and to the world. How great this is depends largely on the value she places on herself—not on how much money she would like, but what she is actually worth. If she will analyze her capabilities carefully and impartially there is no one who knows what she is actually worth so well as she knows herself, and the one who makes good use of this threefold valuation will find that it may be readily coined into money.

There are those who see in a position as wage-earner only the value that they are to themselves, or the money which it brings to themselves. This is but one side of the triangle, and those whose vision is no broader do not permit themselves to attain to their full capacity. The one who sees in her work the duty of being of the most value to her employer so long as she holds her position, whatever the circumstances, has broadened her outlook and increased her value largely, but it is not complete until she recognizes her full value, which includes what she is worth to the world. To some it may seem that the part she can play toward supplying the needs of the world is so small that it does not really count, but every wage-earner is a spoke in the great wheel of business, and it requires every one that is firm and strong to make it complete.

Women who recognize this threefold value are the ones who are able to make their work stand out in bold relief and are selected for advancement when the opportunity arises.

## MODES OF THE

## COMING WINTER

## NOW EVIDENCED

Many persons have prophesied that the undershirt would soon drop from its secondary place, the flaring tunic be lengthened and women go back to one skirt instead of wearing two, as they do now. There is little sign of this at the present moment, for the wide tunic, as contrasted with the narrow skirt beneath, seems to delight women.

This narrow undershirt must be retained in the middle of the back if one would walk with comfort, and it has to be short if one would walk at all. Both of these features are added, or rather incorporated, to the present garment. As to the exact spot between the hips and the ankles where the flare should come, each woman judges of that for herself. Her own length of line must determine it.

Not only have tunics got this width at the hem, but all the modish coats they hang away from the figure as soon as they pass the waist line, and many do not wait for that spot to bulge into space.

The coat with the belt is in the full tide of favor, and it may last through the autumn. This belt is the accessory counted on to give the long waist line. Sometimes it is a sash, an ornate one with flowing ends in military fashion; again, it is severe.

The new idea of combining jet ornaments with white lace frocks is praiseworthy, and here and there one sees such trimming on an orkadee frock, for organdie is the favorite of the moment. It is used for gowns as well as collars.

It may give one a feeling of comfort to read of the winter materials in summer. It may give one a feeling of satisfaction to settle the question of next year's clothes now, although experience should have taught every one that long distance forethought along that line does not help. The suit we bought mentally in August is always far from the one we actually buy in October.

One of the strongest indications that plaited tunics and skirts will continue in fashion next winter is that a leader is weaving his striped materials in the proper width for plaits, spacing the stripes just the right distance apart.

Secretary Daniels announced that the latest four new dreadnoughts would be named Arizona, California, Mississippi and Idaho.

Eugene Lamb Richards, New York state superintendent of banks, has appointed Edward S. Brogan as private secretary at a salary of \$3500 a year. Mr. Brogan is a lawyer.

The armored cruiser Brooklyn, which took a prominent part in the Spanish-American war, left the Philadelphia navy yard for Boston, where she will become a receiving ship.

Those who give it but scanty consideration miss so many points in their endeavors to advance that their work remains dull and commonplace, and so long as they look upon it as such they are not likely to attract the attention to it that is necessary to raise it out of the ordinary class.
